MIKOŁAJ KOSTYRKO

Front-end Developer

About me

I started learning programming at the end of 2018 (Python), with time my interests turned to Front-end related web development. I completed the CodersLab (2020) course, where I learned the React library - but my commercial experience is based on the Angular framework, and Cypress(e2e).

I am seeking an environment of people in which an emphasis is placed on the constant development of an individuals as well as the entire team.
